

TNBX Scope 2 Dashboard

Ir. Mohd Razif bin Abd Halim
Managing Director TNBX

GHG Scope 2 Dashboard

Eliminating GHG Scope 2 Reporting Risk with Automated Billing Intelligence

Manual Process (Existing Entries)

12 x monthly key ins or scan electricity bills of historical bill consumption for all asset's accounts

Typing errors, and missing periods

Wrong kWh impacts to GHG accuracy

Efforts grows with accounts

VS

Automated Dashboard (Subscription-Based)

Only key in 1 x Account no per asset + select year - Fully hands free

Auto-fetched direct from TNB Billing system

Accurate kWh with accurate Scope 2 emissions

1 Click extraction (for any volume)

Effort

Data

GHG Impact

Scalability

Commercial Value Proposition through Subscription-Based Model

Accurate & Verified Historical Bills (Up to 3 Years)

Zero manual errors and **full credibility** as data is sourced directly from TNB's billing system

Enables **reliable year-on-year comparison** for sustainability and financial planning

Saves up to 90% of processing time

Eliminates manual collection and sorting of electricity bills across multiple accounts

Instant dashboard visualization removes the need for spreadsheets and repeated calculations by providing ready insights in real-time.

Alignment with ISSB Global Reporting Frameworks

Dashboard output follows the **same reporting logic and methodology used by TNB**, ensuring high compliance reliability

Supports PLCs in meeting **mandatory sustainability disclosure requirements** for Scope 2 electricity consumption

Flexible Pricing Packages
