INTRODUCTION

Purpose of Guidelines

- 1.01 The *Equity Guidelines* are issued under section 377 of the *Capital Markets and Services Act 2007* (CMSA) and applied by the SC in considering the following proposals under section 212 of the CMSA:
- (a) Issues and offerings of equity securities;
 - (b) Listings of corporations and quotations of securities on the Main Market; and
 - (c) Proposals which result in a significant change in the business direction or policy of corporations listed on the Main Market.
- 1.02 These Guidelines are generally applicable to body corporates whether they are incorporated in Malaysia or outside Malaysia.
- 1.03 These Guidelines, however, do not apply to proposals undertaken by corporations seeking listing or listed on the ACE Market other than for a proposed transfer of listing from the ACE Market to the Main Market. Proposals undertaken by these corporations are governed by the *Bursa Securities ACE Market Listing Requirements*.
- 1.04 Any proposal under paragraph 1.01 which involves–
- (a) bonus issue, rights issue, issuance of preference shares, warrants, options, debt securities, convertible securities and any other securities issuances must comply with the *Main Market Listing Requirements*, as applicable;
 - (b) price stabilisation mechanism must comply with the *Capital Markets and Services (Price Stabilization Mechanism) Regulations 2008*;
 - (c) issuance of prospectus or introductory document must comply with the *Prospectus Guidelines*;
 - (d) valuation of real estate, plant, machinery and equipment must comply with the *Asset Valuation Guidelines*; and
 - (e) issuance of debt securities and sukuk must comply with the *Guidelines on Private Debt Securities and Sukuk to Retail Investors*.

General principles

- 1.05 These Guidelines are formulated to ensure a fair and consistent application of policies. The requirements set out in these Guidelines represent the minimum standards that have to be met by an applicant embarking on proposals. Accordingly, an applicant must observe the spirit and the wording of these Guidelines.
- 1.06 The principles on which these Guidelines are based embrace the interests of listed corporations, the provision of investor protection and maintenance of investor confidence, as well as the need to protect the reputation and integrity of the capital market. The principles include the following:
- (a) An applicant must be suitable for listing and have minimum standards of quality, size, operations, and management experience and expertise;
 - (b) An applicant and its advisers must make timely disclosure of material information and ensure the accuracy and completeness of such information to enable investors to make an informed assessment of the applicant, the proposals and the securities being offered;
 - (c) An applicant and its directors, officers and advisers must maintain the highest standards of corporate governance, integrity, accountability and responsibility;
 - (d) Directors of an applicant must act in the interests of shareholders as a whole, particularly where a related party has material interest in a transaction entered into by the applicant;
 - (e) All holders of securities must be treated fairly and equitably and must be consulted on matters of significance; and
 - (f) Proposals undertaken by an applicant must not be detrimental to the interest of investors or contrary to public interests.
- 1.07 In circumstances not explicitly covered, in making its decision, the SC will have regard to the general principles outlined in paragraph 1.06 where applicable for specific proposals submitted for the SC's consideration.
- 1.08 For avoidance of doubt, where there are issues of securities undertaken as part of a proposal requiring SC's approval under these Guidelines, the SC will consider such issues together with the proposal under consideration.

Consultation with SC

- 1.09 An applicant and its advisers are encouraged to consult the SC on the application of these Guidelines.
- 1.10 For purpose of the following proposals:
- (a) Equity offering and primary listing of a corporation on the Main Market ; and

- (b) Proposals which result in a significant change in the business direction or policy of a listed corporation on the Main Market;

the applicant and its advisers must consult the SC prior to making an application for such proposals.

- 1.11 Sufficient information on the matters to be consulted on must be provided to the SC to ensure a meaningful discussion.
- 1.12 A consultation is not intended to replace careful consideration of the relevant requirements by the applicant and its advisers, nor to replace due diligence required of the parties involved.
- 1.13 The SC may, upon application, grant an exemption from or a variation to the requirements of these Guidelines if the SC is satisfied that–
 - (a) such variation, if granted, is not contrary to the intended purpose of the relevant provision in these Guidelines; or
 - (b) there are mitigating factors which justify the said exemption or variation.

Thereafter, an exemption or variation shall be referred to as “relief” in these Guidelines.

- 1.14 To assist with the interpretation of the requirements under these Guidelines and their application, Guidance have been provided, where appropriate. Any action or conduct which departs from the Guidance will be taken into account by the SC in determining compliance with these Guidelines.

 - (b) a listed corporation intends to undertake a restricted offer for sale or distribute in specie to its shareholders the securities of its subsidiary company which is seeking listing.

- 5.18 Expenses incurred relating to an offer for sale or restricted offer for sale of securities shall be borne by the offeror.

Placement of securities

- 5.19 The principal adviser must act as the placement agent or joint placement agent, where applicable, for any placement of securities under an initial public offering and ensure that the placement fully complies with Appendix 4.
- 5.20 The SC reserves the discretion to require submission of such further information on the placement exercise and the placees as the SC may consider necessary for the purpose of establishing the propriety of the exercise or the independence of the placees.

5.25 Underwriting arrangements in relation to an offering of securities are at the discretion of the applicant and its principal adviser.

5.27 An applicant seeking listing on Bursa Securities must disclose in its prospectus–

5.28 Where the minimum level of subscription is not achieved, the offering of securities must be terminated and all consideration received must be immediately returned to all subscribers.

For infrastructure project corporation which has yet to generate one full financial year of audited operating revenue, the said shareholders must retain their shareholdings amounting to 45% of the issued and paid-up share capital of the applicant. Upon achieving one full financial year of audited operating revenue, the moratorium on the 45% shareholding will be lifted; and
- (c) For an MOG corporation granted relief under paragraph 5.37B, the said shareholders of the MOG corporation are not allowed to sell, transfer or assign any of their holdings in the securities as at the date of listing on Bursa Securities. In relation to paragraphs 5.29(b) and (c), the said shareholders must make an application to the SC for the lifting of the moratorium, demonstrating that the conditions for such lifting have been met.

Valuation

- 5.34 A valuation is required to be conducted for an acquisition of property assets or corporations which own property assets, where the revalued amount of the property assets is used, whether wholly or partly, as the basis for the consideration. - 6.14C There must be sufficient disclosure in the prospectus for investors to make an informed decision whether the level of discount on the securities issued to the management team and the proposed timing of the realisation of their rewards through the sale of the discounted securities are appropriate, taking into consideration the SPAC's business strategy and the management team's contributions.

Moratorium

- 6.15 A moratorium must be imposed on the securities held by the management team of the SPAC and securities acquired by pre-IPO investors at a price lower than the price offered under the initial public offering.

Chapter 7

BACK-DOOR LISTINGS AND REVERSE TAKE-OVERS

7.01 This chapter sets out the requirements for proposals which would result in a significant change in the business direction or policy of a listed corporation, including back-door listings and reverse take-overs but excludes qualifying acquisition proposals undertaken by a SPAC.

Computation of percentage ratios

7.01A The following are requirements relating to the computation of percentage ratios:

- (a) The listed corporation's net assets figure used in the computation of the relevant ratios must be based on—
 - (i) the latest audited financial statements, if the acquisition is announced within the first six months after the audited financial statements are submitted to Bursa Securities for public release; and
 - (ii) the latest announced quarterly financial results, in all other cases;
- (b) Where the asset to be acquired is not an interest in another listed corporation, the net assets figure used in the numerator must be based on the latest audited financial statements of the subject asset;
- (c) The listed corporation's revenue and after-tax profit figures used in the computation of the ratios must be based on the latest audited financial statements, or the latest announced 12-month quarterly financial results, whichever is more up to date. In addition—
 - (i) if the asset to be acquired is an interest in another listed corporation, the revenue and after-tax profit figures used in the numerator must be based on the latest audited financial statements, or the latest announced 12-month quarterly financial results, whichever is more up to date; and
 - (ii) if the asset to be acquired is not an interest in another listed corporation, the revenue and after-tax profit figures used in the numerator must be based on the latest audited financial statements of the subject asset;
- (d) The net assets, revenue and after-tax profit figures used in the computation of the ratios may be adjusted to take into account subsequent completed acquisitions which have a highly significant impact on the financial position of the listed corporation. Such adjustments must be reviewed by a firm of public accountants that is registered with or recognised by the Audit Oversight Board, and whose registration or recognition has not been suspended;

- (e) In computing the percentage ratios based on net assets, revenue and after-tax profits, the numerator of these ratios must be in proportion to the listed corporation's direct interest in the assets being acquired;
- (f) In computing the percentage ratios, acquisition transactions that are entered into during the 12 months prior to the date of the latest transaction must be aggregated with the latest transaction if they—
 - (i) are entered into by a listed corporation with the same person or with persons connected with one another;
 - (ii) involve the acquisition of securities or interest in one particular corporation; or
 - (iii) collectively lead to substantial involvement in a business activity which did not previously form a part of the listed corporation's core business;
- (g) Where any of the percentage ratios computed is a negative figure arising from the denominator (listed corporation) being a negative figure, Chapter 7 would still apply to the transaction unless the listed corporation is able to demonstrate to the SC that the transaction does not result in a significant change in its business direction or policy. In this respect, the applicant and its advisers are required to consult the SC;
- (h) For acquisition of assets through a non wholly-owned subsidiary company, the revenue attributable to the assets being acquired will form the numerator for the consideration to revenue ratio. For clarity, the revenue attributable to that asset must not be in proportion to the listed corporation's interest in the revenue;
- (i) For the consideration to market value ratio, the market value of the ordinary shares of the listed corporation must be determined based on the weighted average market price of the ordinary shares for five market days prior to the date on which the terms of the acquisition are agreed upon.

7.02 The SC will treat a listed corporation undertaking proposals which would result in a significant change in the business direction or policy of the corporation as if it were a new listing applicant. Such proposals must comply with the requirements under either the profit test or the infrastructure project corporation test.

7.03 For an acquisition of assets other than infrastructure project assets, which results in a significant change in the business direction or policy of a listed corporation,—

- (a) the enlarged group or the assets must comply with the profit requirements in paragraph 5.02(a)(i) other than the "uninterrupted" profit requirement; and
- (b) the assets to be injected must comply with the operating history requirements in paragraphs 5.02(a)(ii).

- 7.04 For an acquisition of infrastructure project assets which results in a significant change in the business direction or policy of a listed corporation, the assets must fulfil the requirements in paragraph 5.02(c).
- 7.04A For an acquisition of assets which would result in MOG exploration or extraction activities contributing 50% or more of the enlarged group's total assets, revenue, operating expenses or after-tax profit based on audited financial statements, in addition to complying with the requirements in paragraph 7.03, the listed corporation must comply with the following requirements:
- (a) The MOG assets to be acquired must have an adequate portfolio of at least—
 - (i) in the case of O&G, Contingent Resources; or
 - (ii) in the case of minerals, Indicated Resources,which must be supported by a competent person's report;
 - (b) For the majority of the MOG assets to be acquired, in value,—
 - (i) the legal rights for exploration or extraction activities in respect of the MOG assets must be obtained; and
 - (ii) the listed corporation must have control over the MOG assets;
 - (c) Provide a confirmation that following the completion of the acquisition, an audit firm which has relevant MOG exploration or extraction industry expertise will be appointed as the external auditor; and
 - (d) The listed corporation must have at least one independent director, out of the requisite number of independent directors, with the appropriate MOG exploration or extraction experience or expertise following the completion of the acquisition.
- 7.04B Where MOG exploration or extraction activities are the single largest contributor to the enlarged group's total assets, revenue, operating expenses or after-tax profits based on audited financial statements, the SC may, at its discretion, apply the requirements in paragraph 7.04A to the listed corporation. In this regard, the applicant and its advisers are encouraged to consult the SC.
- 7.04C The SC may consider granting an applicant acquiring MOG assets relief from the requirements in paragraphs 7.03 and 7.05(b) if—
- (a) the fair market value of the MOG assets to be acquired is at least RM500 million and such value is supported by a competent valuer's report;
 - (b) the listed corporation can demonstrate that it has clear plans to advance the MOG assets to commercial production within two years and sufficient funds to do so. Such plans, together with milestones and related expenditures, must

be reviewed and supported by a competent person and provided in the circular to shareholders in relation to the acquisition; and

- (c) the requirements in paragraphs 7.04A(a) to (d) are met.
- 7.04D Where relief is granted under paragraph 7.04C, the vendors of the MOG assets will not be allowed to undertake an offer for sale of any consideration securities received by them.
- 7.05 The assets to be injected must have a healthy financial position, with–
- (a) sufficient level of working capital for at least 12 months from the date of the circular to shareholders and prospectus, where offering of securities is made, as applicable. For an acquisition of assets which falls under paragraphs 7.04A, 7.04B or 7.04C, there must be sufficient level of working capital for at least 18 months from the date of the circular to shareholders and prospectus, where offering of securities is made, as applicable; and
 - (b) positive cash flow from operating activities in the most recent financial year and without accumulated losses based on latest audited financial statements at the time of submission to the SC, if the acquisition is subjected to the profit test.
- 7.06 The listed corporation must demonstrate that it has the expertise and resources to manage the assets to be injected, if the assets are different from those of the listed corporation’s existing core business.
- 7.07 Where there is a change in the controlling shareholder or board of directors of the listed corporation, the assets to be injected must have had continuity of substantially the same management for at least three full financial years prior to submission to the SC or, in the case of an infrastructure project corporation or asset, since the commencement of its operations, if less than three full financial years.
- 7.08 In complying with the requirement on continuity of substantially the same management, the applicant must demonstrate that, throughout the relevant period,–
- (a) the executive directors of the assets to be injected have had direct management responsibilities for, and played a significant role in the business; and
 - (b) the senior management of the assets to be injected has not changed materially.
- 7.09 Where the requirements of paragraph 7.08 are not met, the applicant must demonstrate to the SC and disclose in the circular to shareholders and prospectus, where applicable, the expertise and capability of the management in ensuring that the operations are managed effectively.
- 7.10 Where the assets are to be acquired from a related party, the principal adviser must confirm to the SC that the acquisition complies with the applicable provisions pertaining to related-party transactions in the *Main Market Listing Requirements*.

Valuation

- 7.11 A valuation is required to be conducted for an acquisition of property assets or corporations which own property assets, where the revalued amount of the property assets is used, whether wholly or partly, as the basis for the consideration. The revalued amount of the property assets in this context refers to property assets which are to be revalued or have been revalued in the past prior to the submission to the SC.
- 7.12 Notwithstanding paragraph 7.11, where the asset acquired by the listed corporation is that of a property investment or property development corporation, an independent valuer has to be appointed by the listed corporation to conduct a valuation of the material real estate of the acquiree corporation.
- 7.13 The SC, whenever it deems appropriate, may also require an applicant to conduct a valuation on any asset other than those referred to in paragraphs 7.11 and 7.12.
- 7.14 The SC may obtain a second opinion on the valuation report submitted by the listed corporation. Where a second opinion valuation is required, the valuer conducting the valuation has to be appointed by the SC, at the cost of the listed corporation and the lower of the two valuations must be adopted as the basis for the purchase consideration.
- 7.15 [deleted]

Placement of shares to meet shareholding spread

- 7.16 Where shares are issued as consideration for the acquisition, the listed corporation must state—
- (a) whether it will comply with the shareholding spread requirements under the *Main Market Listing Requirements* upon completion of the acquisition; and
 - (b) its plans to comply with such requirements, if there is non-compliance.
- 7.17 The principal adviser must act as the placement agent or joint placement agent, where applicable, and ensure that the placement fully complies with Appendix 4.
- 7.18 The SC reserves the discretion to require the submission of such further information on the issue or placement exercise and the placees as the SC may consider necessary for the purpose of establishing the propriety of the exercise and independence of the placees.

Moratorium

- 7.19 Where an acquisition of assets results in a change in the controlling shareholder or board of directors of the listed corporation, a moratorium will be imposed on the consideration securities received by the vendors of the assets, as follows:

- (a) For an acquisition of assets other than infrastructure project assets, the vendors will not be allowed to sell, transfer or assign their entire consideration securities for six months from the date the securities are listed on Bursa Securities from the date of issue if the securities are not listed;
- (b) For an acquisition of infrastructure project assets, the vendors will not be allowed to sell, transfer or assign their entire consideration securities for six months from the date the securities are listed on Bursa Securities or from the date of issue if the securities are not listed. The moratorium will be lifted immediately at the end of the six months if the infrastructure project assets have generated one full financial year of audited operating revenue, otherwise, the consideration securities will continue to remain under moratorium until one full financial year of audited operating revenue is generated;
- (c) Where relief is granted under paragraph 7.04C, the vendors will not be allowed to sell, transfer or assign their entire consideration securities until such time that the MOG assets acquired have achieved one full financial year of operating revenue and positive cash flow from operating activities, based on audited financial statements.

In relation to paragraphs 7.19(b) and (c), the vendors must make an application to the SC for the lifting of the moratorium, demonstrating that the conditions for such lifting have been met.

- 7.20 Where the vendors of the assets are corporations which are not listed, all direct and indirect shareholders of these corporations, if they are individuals or other corporations which are not listed, up to the ultimate individual shareholders must give undertakings to the SC that they will not sell, transfer or assign their holdings in the securities of the related corporations which are not listed for the period as stipulated in paragraph 7.19, as applicable.

Chapter 8

In fulfilling this requirement, the daily market capitalisation, based on the daily volume-weighted average price, of the ordinary shares for the one-year period ending on the last business day of the calendar month immediately preceding the date of submission to the SC must be at least RM500 million; and
 - (c) Infrastructure project corporation test in paragraph 5.02(c)(i).
- 8.02 The SC, in considering a transfer of listing proposal via the market capitalisation test, will take into account any past records of unusual market activities or other events which may have adversely affected the fair and orderly trading of the listed securities of the corporation, including any designation or trading restrictions imposed by Bursa Securities for the past one year prior to submission to the SC.
- 8.03 The applicant must comply with the healthy financial position requirements in paragraph 5.08.

1. Risk factors that relate to each other should be grouped together. Appropriate and meaningful headings and sub-headings should be adopted. For example, headings may include risks relating to the proposal, the target asset and its business or industry.
2. Risk factors should be listed in such manner whereby the risks that would have the highest impact should be prominently disclosed at the beginning of each section.
3. The purpose of risk factors is to provide meaningful cautionary statement to the shareholders. Hence, any disclaimer statement should not be so wide so as to prevent the risk factors from having this effect. For example, the use of the following statement should be avoided:

"The risks and investment considerations set out below are not an exhaustive or exclusive list of the challenges that we currently faced or that may develop in future. Additional risks, whether known or unknown, may in the future have a material adverse effect on us, the proposal, the issuer or target asset."

For example,

- (a) when disclosing the target asset's business overview, it would not be appropriate to provide a general statement that "the target asset is dependent on a major customer". An adequate risk disclosure would be to state the revenue contribution by the major customer as this would clearly illustrate the target asset's dependency on such major customer. In addition, the description on the major customer should include the name of the major customer and its relationship with the target asset, level of sales and how the loss of such major customer would have a material adverse effect on the target asset;

- (b) if the target asset is dependent on a major supplier, it would not be appropriate to provide a general statement that “the target asset is dependent on a major supplier” without details of the name of the major supplier, level of purchases, length of relationship with the target asset and how the loss of such major supplier would have a material adverse effect on the target asset; or
 - (c) the target asset is dependent on licences or permits, it would not be appropriate to have a risk factor on possible non-renewal of such licences or permits unless there is a genuine and specific reason for such a risk.
5. There should be no disclosure of mitigating facts that could cause confusion on the nature of the risk or its materiality.

- 13.03 The future financial information must be presented in accordance with the approved accounting standards adopted by the target asset.

A discussion on the impact of any likely change in business and operating conditions included in the future financial information must also be stated.
- 13.06 The reporting accountant must review and report on the underlying accounting policies and assumptions relied on in the preparation of the future financial information.

Guidance – Future financial information

1. Advisers are encouraged to consult the SC at an early stage if they require clarification, for example where future financial information is proposed to be included in the circular.

Guidance to paragraph 13.01 – Future financial information

2. In preparing the future financial information, the bases and assumptions used to support such information should–
 - (a) draw the shareholders' attention to those uncertain factors which can materially affect the ultimate achievement of such future financial results, and where possible to quantify such factors;
 - (b) be specific rather than vague, avoid generalisations and all- embracing assumptions and those relating to the general accuracy of the assumptions made in the future financial information;
 - (c) be clearly stated and reviewed for reasonableness by the directors who are responsible for the future financial information and bases and assumptions; and

- (d) enable the shareholders to assess–
 - (i) the validity of the assumptions on which the future financial information is based;
 - (ii) the likelihood of the assumptions actually occurring;
 - (iii) the effect on the future financial information if the assumptions vary;
 - (iv) whether the future financial information is relevant and reliable, i.e. to enable shareholders to form their own view about how reasonable the grounds are for making the statement; and
 - (v) the facts and circumstances that support future financial information, as well as being able to demonstrate that the information is reasonable.

3. In addition to item 1 above, the listed corporation and principal adviser should be satisfied that, the bases and assumptions relied on in the preparation of the future financial information, are reasonable. What amounts to reasonable bases and assumptions should be judged by the facts and circumstances of each case. However, in general, the future financial information should assist the shareholders in making an informed investment decision.

4. In deciding whether the bases and assumptions are reasonable, the listed corporation and principal adviser should have regard to the following indicative factors:
- (a) the information relates to agreements where future expenses and revenue of the issuer can be reasonably assured for the period of that agreement;
 - (b) the information is underpinned by independent industry experts' reports or independent accountants' reports where such experts believe that the future financial information and its bases and assumptions are reasonable; and
 - (c) the information includes reasonable short-term estimates relating to an existing business and based on events that the management of the listed corporation reasonably expects to take place or actions that the management of the listed corporation reasonably expects to occur.

The above factors are not necessarily conclusive. Most importantly, in certain circumstances, these factors alone may not be sufficient to establish reasonable bases and assumptions. Hence, in preparing future financial information, the listed corporation and principal adviser are required to consider other factors that may indicate whether or not the bases and assumptions used are reasonable.

5. Certain factors may indicate that the future financial information has not been prepared on reasonable bases and assumptions. Such factors include where:

- (a) the future financial information is supported only by hypothetical assumptions, and without demonstrating other factors that may support the inclusion of the future financial information;
- (b) the listed corporation has made a statement asserting that the bases and assumptions relied on are reasonable, without coming up with verifiable reasons to support such a statement; and
- (c) the listed corporation has made a statement along the lines of 'this is the best estimate of the directors'. The bases and assumptions relied on by the listed corporation in preparing the future financial information has to be objectively reasonable, taking into account among others, the list of factors set out under this Guidance and not made on the basis of genuine but unreasonable beliefs of the directors of the listed corporation.

The above factors are non-exhaustive. The listed corporation and principal adviser are strongly encouraged to consult the SC at an early stage should they face any difficulty in determining whether the bases and assumptions to be relied on are reasonable.

PART VI
GUIDANCE

Guidance

Guidance 1: Suitability for listing

This Guidance provides further clarification to Chapters 1, 5, 7 and 8 on the qualitative aspects relating to the SC's expectation of the assessment by a principal adviser on the suitability of an applicant seeking listing on Bursa Securities.

For an applicant, other than a SPAC, the principal adviser may take into consideration, among others, the following factors:

- (a) The applicant's corporate governance structure and record;
- (b) The applicant's business attributes which may include—
 - (i) the applicant's involvement in a profitable and growth industry;
 - (ii) the barriers to entry in the industry which the applicant operates;
 - (iii) the market size for the applicant's principal products or services;
 - (iv) the range of products or services of the applicant including any quality recognition or established brand name;
 - (v) the applicant's presence in diversified markets with strong customer base or long-term business relationships or long-term contracts with customers;
 - (vi) the applicant's human resources and skilled workforce;
 - (vii) the source of supply of materials or services required in the applicant's operations; and
 - (viii) the prospects for growth in revenue and profit generated by the core business.

Guidance 2: Core business

This Guidance provides clarification to the term "core business" as referred to in Chapters 5, 6, 7 and 8 of these Guidelines.

Generally, the core business of a corporation may be determined and distinguished by considering the following factors:

- (a) The economic sector or sub-sector and industry the corporation is mainly involved in;
- (b) The nature of its principal products and services;
- (c) The nature of its production processes;
- (d) The type or class of customers for the products or services;
- (e) The methods used to distribute the products or provide the services;
- (f) The allocation of resources including management time and efforts; and
- (g) Where applicable, the nature of the regulatory environment governing the business.

Guidance 3: Guidance to paragraphs 5.08(a) and 7.05(a) – Sufficient level of working capital

In assessing whether the applicant or assets to be injected have sufficient level of working capital from the date of the prospectus or circular to shareholders, where applicable, the cash flow position of the applicant or assets to be injected should be reviewed, taking into consideration, amongst others, the following:

- (a) capital structure including the level of indebtedness;
- (b) future plans including projected levels of capital expenditure and other investment plans; and
- (c) any intention for the declaration or payment of dividends.

Guidance 4: Guidance to paragraph 5.09(i) – Control over applicant

- (a) In determining control, the SC would consider the principle of control as set out in the approved accounting standards.

Guidance 5: Guidance to paragraphs 5.37A(a), 6.38A(b) and 7.04A(a) – Adequate portfolio of resources

In determining the adequacy of the portfolio of mineral, or O&G resources, the following are some of the factors which may be considered by the SC:

- (a) For O&G resources, the availability of–
 - (i) proved and probable reserves to sustain production of at least five years, supported by a competent person's report; or
 - (ii) Contingent Resources of at least RM500 million, supported by a competent valuer's report. However, the SC may, at its discretion, exclude certain resources classified as Contingent Resources after taking into consideration the nature of the contingency, i.e. the certainty in resolving the contingent issues to progress the assets to development stage within two years;
- (b) For mineral resources, the availability of–
 - (i) proved and probable reserves to provide a mine life of at least five years, supported by a competent person's report; or
 - (ii) Indicated Resources of at least RM500 million where sufficient work has been done on the Modifying Factors, supported by a competent valuer's report. However, the SC may, at its discretion, exclude certain resources classified as Indicated Resources where sufficient work has not been done on the Modifying Factors.

These factors do not form an exhaustive list of the SC's considerations. Where appropriate, the SC may consider other factors in determining whether the portfolio of mineral, or O&G resources are adequate for the applicant to sustain business operations upon listing or acquisition.

Guidance 6: Guidance to paragraphs 5.37A(b)(ii), 6.38A(c)(ii) and 7.04A(b)(ii) – Control over MOG assets

- (a) Generally, control is demonstrated through the holding of a majority interest, i.e. more than 50%. It is important that an applicant and its advisers consider the particular arrangement(s) between the interested parties to ensure that the rights of the corporation reflect the majority interest held or to be acquired.
- (b) The SC may consider, on a case-by-case basis, an interest of between 33% and 50%, if an applicant is able to demonstrate that it has sufficient influence over activities that significantly affect the returns on investment in the MOG exploration or extraction assets. This is to be contrasted with decisions over administrative matters. Activities that significantly affect returns to investors include the following:
 - (i) Establishing operating and capital decisions for the assets, including budgets and technology to be applied; and
 - (ii) Appointing and remunerating key management personnel or service providers, and terminating their services or employment.
 - (iii) For clarity, a “blocking vote” in itself, will not be adequate for the purposes of establishing “sufficient influence”. The SC will consider that an MOG corporation has “sufficient influence” when a decision cannot be made without the MOG corporation’s support.

Guidance 7: Guidance to paragraphs 5.37A(c), 6.38A(d) and 7.05(a) – Working capital requirements

- (a) Property holding costs and costs of any proposed exploration or development should be considered as part of the working capital requirements.

Guidance 8: Guidance to paragraphs 5.37A(e), 5.37A(f), 6.38A(f), 7.04A(c) – Expertise of external auditors and reporting accountants

- (a) Applicants should demonstrate compliance with these requirements at the point of submission of the application to the SC.
- (b) Audit firms and reporting accountants, in demonstrating its MOG exploration or extraction industry expertise, may rely on the experience of its network firms provided the relevant partner-in-charge from the network firm is involved in the engagement.

Guidance 9: Guidance to paragraphs 5.37B(b), 6.38A(g)(ii) and 7.04C(b) – Sufficient funds to undertake plans

- (a) An applicant may take into consideration proceeds from–
 - (i) issues of securities undertaken as part of the listing scheme in demonstrating compliance with paragraph 5.37B(b); or
 - (ii) any fund raising carried out in conjunction with the acquisition in demonstrating compliance with paragraphs 6.38A(g)(ii) and 7.04C(b).

Guidance 10: Guidance to paragraph 6.24

- (a) Generally, the following would be considered as part of operating costs, and costs relating to funding the search for a target business and completing the qualifying acquisition under paragraph 6.24:
 - (i) Expenses related to identification and evaluation of the qualifying acquisition, including reasonable expenses for travel and accommodation;
 - (ii) Expenses related to obtaining regulatory and shareholders approvals;
 - (iii) Expenses related to compliance with regulatory requirements, such as audit and statutory fees; and
